## Vision

The Australian Capital Territory makes an outstanding contribution, regionally and nationally, to the conservation of Lowland Woodland.

Before European settlement, the temperate woodlands of the ACT and region, and their component floral and faunal communities, were once part of a great grassy woodland mosaic covering much of sub-coastal south-eastern Australia. In acknowledgment of the importance of this connectivity, the *ACT Lowland Woodland Conservation Strategy* takes an integrative, territory-wide approach within a regional context, to the protection of the remaining lowland grassy woodlands. It recognises that in addition to the relatively intact, endangered woodland community there is a spectrum of woodland-grassland blends also of conservation value. The *Strategy* includes actions to identify important areas and proposes means to protect them and to identify areas suitable for regeneration and restoration to reconnect the mosaic. It will provide a guide to land use planning and environmental management in the ACT with respect to the remaining lowland woodlands.

## **Acknowledgements**

The *Strategy* was prepared for the Conservator of Flora and Fauna by the Wildlife Research and Monitoring Unit of Environment ACT. The team comprised: Mark Dunford (data management and mapping), Murray Evans, Marjo Rauhala, Sarah Sharp and David Shorthouse assisted by Peter Ormay, Nicola Webb and Lara Woollcombe.

Additional field assistance was provided by contract staff: Nina Bishop and Judith Harvey. Data entry was assisted by Alita Oakley.

Kevin Frawley prepared drafts of the report and managed its compilation.

Progress in preparing the *Strategy* was reported to the ACT Flora and Fauna Committee, and individual members provided expert comment and advice.

Use of unpublished information from ecological studies on the Superb Parrot (Adrian Manning post-graduate research student, Australian National University) and from the bird database held by the Canberra Ornithologists Group, is gratefully acknowledged.

Fiona Baker prepared the front cover illustration. Figure 2.2 was drawn by Pat Campbell.
